

令和6年度岐阜大学大学院連合農学研究科
研究者倫理・職業倫理, メンタルヘルス・フィジカルヘルス 8月22日(木), 23日(金)

受講学生 30名

A 全体的な印象はどうでしたか？

B 講義(研究者倫理・職業倫理)はどうでしたか？

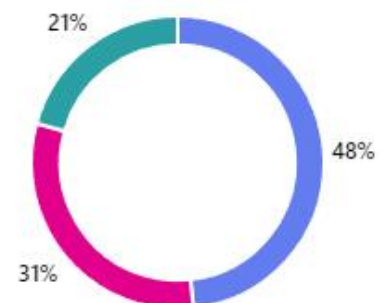

倫理教育の重要性を感じました。
海外の人を交えたグループディスカッションを行うことで、他国の人がどのような意見を持っているか知ることができた点。
研究者倫理の方だけで良かったかもしれない。
The Mitsunaga sensei's lessons have a warning significance, reminding us not to academic impropriety, and I am impressed by the teamwork in making posters
the professor also lesson was good
グループディスカッションで博士課程の友人と交流できた点
これまで実際に起きた事例が予想より多いことを認識できたことから倫理観を持つことの重要性を考えるきっかけになった。
資料の冊子を行き来して少しわかりづらかった
Research ethics hold a crucial place in our work. They are not only the foundation of academic research but also principles that every researcher must keep in mind. Research ethics guide us on how to protect participants' rights, respect their privacy, and ensure the authenticity and fairness of our research results throughout the research process. By remembering and adhering to research ethics, we can enhance the quality of our research while safeguarding our reputation and moral responsibility as scholars.
研究者としての心構えを改めて確認できた点
The knowledge I gained will be beneficial for future research.
The professor gave us some examples to demonstrate what it is about research misconducts, which is very important for our research career. Everyone is required to keep them in our mind and not to be again them.

The lecture is very helpful for the daily lives of the student.
I could gain lot of knowledge and information related to ethics of different countries.
難しすぎず、かみ砕いた内容だったのが理解しやすくて良かった。また、実例が多くあったのもよかった。
It was very informative and we were learned lots of things .
I realized me a lot that as a researcher, we need to keep in mind about ethics. I could obtain new information on what concern really needs to be carried out regarding to ethic as a researcher or professional. Special thanks to Prof. Mitsunaga for his great and easy to understand during the lecture. As the student who participated in the class, it would be more interesting if when we can present a different topic (free-to-choose topic) for each group for the poster presentation so that we could have more varied information and point of view.
講義「職業倫理、研究者倫理」について、大変良かったと感じました。具体的な事例を交えた説明や、ディスカッションの機会があり、倫理に対する理解が深まりました。また、講師の豊富な経験に基づいた内容が非常に分かりやすく、信頼性が高かったです。
the material of the lecture is helpful for us to deepen our knowledge about research misconduct
知識を得るだけでなく、グループ討論により考えを深められたことが良かったと感じた。
Teamwork is very interesting and I learned about emergency rescue a lot
I have learned something new
企業における倫理規定違反が起きる背景となる心理的な動きについて知ることができた。 一方で、公害や原子爆弾を議題にした科学技術の暴走的な議論においては、日本の話題が中心になりすぎて、留学生には不親切ではなかったかと思う。
The lecture give us different perspective about what to do's and don'ts in research
グループディスカッション方式で他の学生と対話出来た点が良かったです。
This class was very insightful so that the students could have a good vision of their future

C 講義(メンタルヘルス・フィジカルヘルス)はどうでしたか？

- 1. Very good 大変良かった 14
- 2. Good 良かった 9
- 3. Fair 普通 6
- 4. Poor 良くなかった 0

AEDをはじめて体験しました。
軽視しがちな自分自身の生活習慣などを見直すことができた点。
授業の密度を上げればもう少し時間を短縮できたように感じる。
I learned important first aid knowledge and participated in simulation exercises
the proffesor was prefesional on his work
AED の使い方を具体的に知ることが出来た
応急処置の優先順位や日頃の体調、精神管理が研究活動を行う私たちにとってどれほど重要なものなのかということを理解できた。
模型があったのが良かった。
we have learned the procedures and precautions for first aid, which are vital in emergency situations. These skills enable us to respond calmly and correctly in critical moments, minimizing harm to the greatest extent possible.
ロールプレイに時間がかかりすぎて手持ち無沙汰な時間が長かった点
I enjoyed the small activities performed during the class as well as the content of the lecture was good.
Professor gave us a very complete demonstration about what is physical and mental health and gave everyone a chance to practice how to use AED, which is very necessary for everyone.

The student can relate to the topics. I love how we are encourage to participate in the demonstration during the lecture.
learned how to stay motivated
AED 講習や、緊急事態の対応など、実生活に役立つ内容が多くて良かった。
We learned very important things about our health ,life style and also how we will do on different emergency situations .
I would like to thank Prof. Yamamoto for his very informative lecture. I could obtain a lot of information about health, and how mental health could affect our physical health. This lecture helped me to care more about my self and that even we have too many task to do as a Ph.D student, we still need to balance our work-life in order to keep our health. It The PCR demo is also very interesting.
講義「メンタルヘルス・フィジカルヘルス」について、大変良かったと感じました。特に、実際に体験しながら急救の知識を学ぶことができた点が印象的でした。このような実践的な学びは非常に重要であり、今後の生活や緊急時に役立つと感じました。
Probably, the time for the lecture should be shorter than the last one. And also I hope the next lecture will be more interactive with the audience by giving some "ice break"
自身の健康状態や生活習慣を見つめ直す良い機会であったと感じた。
Teamwork is very interesting and I learned about emergency rescue a lot
Very interesting. I have learned something new
普段の生活の不健康さを認めるきっかけになった。
The lecture conducted hands on of AED which is something new for most students.
心と体の健康についての科学的知見を得ることが出来た点が良かったです。
This class was perfect. Because this class teaches us to stay healthy and respect body

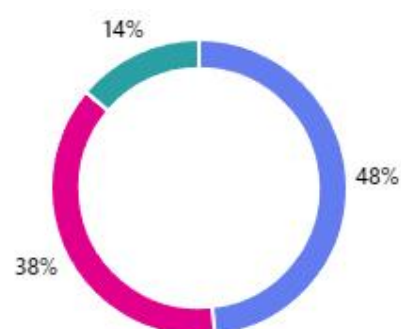

D グループ討論はどうでしたか？

日本人だけ、留学生だけで分けられていたのは、良かったと思う。 知らない人と話せてなかなか面白かった。
this group was made me understood that is all country problems
短い時間だったが、グループディスカッションを通じて研究倫理について自分の中でどのように築いていくのかという行動指針の参考になった。
Through group discussions, poster creation, and presentations, we can enhance our understanding of the course content. These activities encourage active participation, collaborative learning, and deeper engagement with the material, helping everyone to grasp the concepts more thoroughly.
The exchange of ideas is the key to good research.
I really appreciate this chance to learn research ethics and mental and physical health, which is helpful to both our research career and our health. Thank you very much.
It was very fruitful. got to know lot of information regarding research world .
Our group members were very cooperative and kind
I enjoy the group discussion. This could help us to learn on how to deliver our thoughts in a group and how to work as a team. It may become more interesting if the topic of each group is different (it could be like free-to-choose topic). It may also would be better to mix all the students, the Japanese and international students so we could get along together, and at the end, we could collect more diverse information and diverse point of view.
Group discussions from various country of participants in transferring information from one to another might be challenging but also interesting in discussing about poster decision.
The group discussions were very interactive. Because every member gives excellent perspective on research ethics

E グループ発表はどうでしたか？

1. Very good 大変良かった	14
2. Good 良かった	11
3. Fair 普通	4
4. Poor 良くなかった	0

was great idea
Through group discussions, poster creation, and presentations, we can enhance our understanding of the course content. These activities encourage active participation, collaborative learning, and deeper engagement with the material, helping everyone to grasp the concepts more thoroughly.
My team members were so nice and humble
I really appreciate this chance to learn a lot about research ethics and mental and physical health from two professors and other classmates. Both of them are very important because the former is vital to our research career and the latter is critical to our health, which is the very basic part of everything. Thank you very much.
presented together. discussed a lot of factors related to research work.
I was wondering when everyone presented. Every one are so talented. Overalls it was very excellent experience.
All groups have very insightful views. It makes us more careful to avoid mistakes in research ethics.

F 同級生と交流することができましたか？

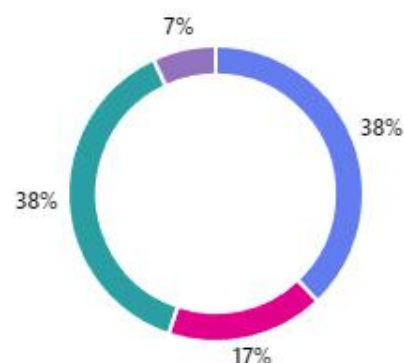

1. Very good 大変良く交流した	15
2. Good 比較的交流した	13
3. Not good あまり交流できなかった	1
4. Poor ほとんど交流できなかった	0

飲み会でもやれると面白いかもしれない。
yes, with diversty group and nice lecturer
I'm very happy to have made new friends and, through group discussions and presentations, I've gained insights into the current state of research ethics in other countries.
It is very enjoyable to me to communicate with students from different majors and countries.
communicated with students from diferent countries got to know about their experience related to research field.
Yes. My group mates are very nice and they could work collaboratively.

G 先生と交流することができましたか？

● 1. Very good	大変良く交流した	11
● 2. Good	比較的交流した	5
● 3. Not good	あまり交流できなかった	11
● 4. Poor	ほとんど交流できなかった	2

yes, they are very kind and nice
No
Because of limited time, I didn't ask too much
Everyone very cooperative.
Yes, the teaching staff and faculty staff are very helpful and informative

H その他, 意見を自由にお書き下さい。

thank you for all your kindness,
Thank you very much for giving all of us such a valuable chance to learn such things and communicate with other students
It was a wonderful experience for me. I have gained a lot of knowledge.
Thank you very much organiser committee for organised this kind of opportunity for us.
Thank you very much to all of UGSAS-GU Staff and the Professors for organizing the lecture for us. It was a great experience. I hope the best for the next ones.
Hopefully this class will continue to be held, so that it will produce good PhD students in the future.
